

## Become part of the solution and join the revolution!

Contact me to join SmartKlean's eco-friendly movement in this area! Become a distributor and help others reduce health risks and save 'loads' of money while promoting sustainability. Your contribution will not only benefit you, your local community and the environment, but it will help our small business survive against giant corporations.

Demand is growing rapidly for our product, therefore becoming a distributor now can be highly lucrative. Learn more about SmartKlean's distribution business model [here](#).

### What is the difference between a (R) Representative and (D) Distributor?

A SmartKlean **Representative** is given exclusive rights over a specific territory or territories. In order to maintain an active Rep status, a minimum wholesale amount must be purchased every 60 days. The minimum order quantity varies between different areas according to the size of the territory's population.

SmartKlean **Distributors** have no territorial rights or protection. In order to maintain an active (D) status, the Distributor must purchase a small minimum of 1 box of 12 units every 60 days. They can purchase and sell stock directly from SmartKlean as long as there is no Representative in their area.

In the event where a Representative exists in the distributor's territory(ies), the distributor must purchase stock from their territory's Representative and sell within their guidelines.
